

Happy Friday,

Module 1 looks great in the LMS! Thank you very much for the quick turn-around.

I have added some suggestions below to guide us moving forward with course builds. I also appended each link to my comments that corresponds with the page in the LMS.

Lastly, here is a link to the SharePoint document where you can select "Done" or add a "Reply" to my recommendations. Once the link opens, select "Comments" in the upper right corner to see my suggestions. Once you click on the comment, you will have the option to "Reply" or mark "Done".

Once again, thanks for your promptness and awesome attention to detail.

1. There are no instructions for the interaction guiding learners on what they are to do. It displays as a blank box, until you click a radio dial. However, learners may not know to click the button. I would also suggest this interaction displayed on a page by itself.

2. As the captivate interaction is not accessible, I would suggest using the native BB quiz maker feature.

Alt Text is needed for this interaction in the LMS; it is not accessible (ADA guidelines).

3. This statement is best seen if placed under "Instructions. **“To open this Journal Activity in a new tab: Right click on the hyperlinked page title or the "Click to Launch" text and click "Open Link in New Tab.”**

4. This diagram is not accessible in the LMS. Alt text and/or textual representation of the information is needed.

6. I would suggest embedding this video to influence viewing habits. Here is the embed code:

7. This image needs appropriate Alt Text. Here is a language suggestion:

"Special Education is: A Legal Designation (IDEA), A Range of Services, and Specialized Instruction."

8. The information on this image also needs textual representation or, alternatively, Alt text insertion for each purpose outlined.

9. This is best seen if placed under "instructions": **To open this Journal Activity in a new tab: Right click on the hyperlinked page title or the "Click to Launch" text and click "Open Link in New Tab."**

10. The example provided here is important. I would recommend avoiding the use of color when conveying essential information. (ADA guideline): **Ex. –**
